

AN ACT CONCERNING THE NEW ESPACE

1 Section 1 . Section 45 of the code is repealed by

2 (a) Not later than July 1, 2017, the Water Planning Council, 3 established pursuant to section 25-330, shall, within available 4 appropriations, prepare a state water plan for the management of the 5 water resources of the state. In developing such state water plan, the 6 Water Planning Council shall: (1) Design a unified planning program and budget; (2) consider regional water and sewer facilities plans; (3) 8 identify the appropriate regions of the state for comprehensive water 9 planning; (4) identify the data needs and develop a consistent format 10 for submitting data to the council, applicable state agencies and 11 regional councils of governments for use in planning and permitting; 12 (5) consider the potential impact of climate change on the availability 13 and abundance of water resources and the importance of climate 14 resiliency; (6) seek involvement of interested parties; (7) solicit input 15 from the advisory group established pursuant to section 25-330; (8) 16 consider individual water supply plans, water quality standards, 17 stream flow classifications, as described in regulations adopted 18 pursuant to section 26-141b, water utility coordinating committee 19 plans, the state plan of conservation and development, as described in 20 section 16a-30, and any other planning documents deemed necessary

- 21 by the council; (9) promote the adoption of municipal ordinances
- 22 based on the State of Connecticut Model Water Use Restriction
- 23 Ordinance for municipal water emergencies; and (10) examine
- 24 appropriate mechanisms for resolving conflicts related to the
- 25 implementation of the state water plan.
- 26 (2) the new info
- 27 <u>(3) another</u>
- 28 <u>94) asdasdasdad</u>
- 29 (b) The state water plan developed pursuant to subsection (a) of this 30 section shall: (1) Identify the quantities and qualities of water that are 31 available for public water supply, health, economic, recreation and 32 environmental benefits on a regional basin scale considering both 33 surface water and groundwater; (2) identify present and projected 34 demands for water resources on a state-wide and regional basin scale; 35 (3) recommend the utilization of the state's water resources, including 36 surface and subsurface water, in a manner that balances public water 37 supply, economic development, recreation and ecological health; (4) 38 recommend steps to increase the climate resiliency of existing water 39 and infrastructure; (5) make recommendations resources 40 technology and infrastructure upgrades, interconnections and such 41 major engineering works or special districts which may be necessary, 42 including the need, timing and general cost thereof; (6) recommend 43 land use and other measures, including an assessment of land 44 acquisition or land protection needs, where appropriate to ensure the 45 desired quality and abundance of water and to promote development 46 in concert with available water resources; (7) take into account desired 47 ecological, recreational, agricultural, industrial and commercial use of 48 water bodies; (8) inform residents of the state about the importance of

water-resource stewardship and conservation; (9)establish guidelines and incentives for conservation consumer conservation with due consideration for energy efficiency; (10) develop a water reuse policy with incentives for matching the quality of the water to the use; (11) meet data collection and analysis needs to provide for data driven water planning and permitting decisions; (12) take into account the ecological, environmental, public health and safety and economic impact that implementation of the state water plan will have on the state; (13) include short and long-range objectives and strategies to communicate and implement the plan; (14) seek to incorporate regional and local plans and programs for water use and management and plans for water and sewerage facilities in the state water plan; (15) promote intraregional solutions and sharing of water resources; (16) develop and recommend strategies to address climate resiliency including the impact of extreme weather events; and (17) identify modifications to laws and regulations that are necessary in order to implement the recommendations of the state water plan.

(c) The Water Planning Council shall provide a time period of not less than one hundred twenty days for public review and comment prior to finalizing such plan. The Commissioners of Public Health and Energy and Environmental Protection, the chairperson of the Public Utilities Regulatory Authority and the Secretary of the Office of Policy and Management shall post such draft plan and information concerning such comment period in a conspicuous location on their respective web sites. The Council on Environmental Quality shall post such draft plan and information concerning such comment period in the Environmental Monitor. The Water Planning Council shall advertise and hold not less than one public hearing during such public review and comment period. After such public comment period, the council shall fully consider all written and oral comments concerning the proposed state water plan. The council shall make available the
